## Firefox Proxy

After setting up the Firefox proxy, there were some serious blocks going on. It didn't like anything that had to do with food. Cooking sites and even apple was blocked. The cit site worked but it was even taking forever to load and the images were acting funny.

## Welcome to the linux & Information Technologies Department

The linux & Information Technology (CIT) programs at DSU have the latest equipment, the best software, and a strong faculty who can teach you to use it well. The CIT programs prepare students for careers in graphic design, illustration, web development, multimedia, digital video, systems administration, security and networking, software engineering, and linux programming.

The department offers students a general linux & Information Technology degree as well as the option to focus on any of three areas: linux Science, Information Technology, or Visual Technologies. CIT also coordinates with the Udvar-Hazy School of Business in offering a Bachelor of Science in Business with an emphasis in Visual Technologies. - [see degrees & certificates](#)

The fields of linux & Information Technology are diverse, exciting, rapidly changing, and ever expanding. Our programs offer you the opportunity to be challenged in small, personalized classes where you can develop your knowledge and skills to be successful.

**There are 4 areas of emphasis in CIT:**
