Hi Heather,

I have 4 years of professional engineering experience, 2 apps on the App Store totaling almost 1000 downloads and a passion for creating truly great apps.

I have worked in team and solo environments and thrive in both. I take a disciplined approach to code structure, test coverage, and documentation. You can find examples of my work on my website (<http://armstrongnate.com>) and on GitHub (<https://github.com/n8armstrong>).

I am confident that I will make a great addition to your team and would greatly appreciate the opportunity to chat. I am currently located in St. George, Utah but am willing to relocate to northern Utah as soon as necessary.
