Dear Hiring Manager,

I am applying for the iOS Software Engineer position. I will be graduating with a degree in Computer Science this December so I will be available for hire in January. I am currently living in Utah but am looking to relocate.

Though I will be recently graduated, I have been developing software professionally for almost 3 years. You can find examples of my work in the attached resume as well as on GitHub:

<https://github.com/n8armstrong>

I look forward to hearing from you.

Sincerely,

Nate Armstrong
